

Summary for Cases (Defects) 5/26/2025

Project: Mercury Tours Testing Project

By Hesham Sedky, 5/26/2025 11:44 AM

This report provides a comprehensive summary of defects found during test execution. It maps defects to their corresponding test cases within the selected test suite. The report highlights defect coverage and status to assist in identifying critical areas requiring attention.

Test Runs

No test runs found with defects.

Flight Search

Standard Search Flows (3)

Verifies successful searches using valid input with different combinations (round trip, one way, etc.).

ID	Title	Type	Section	Latest & Combined
C114	Round Trip Flight Search with Valid Inputs	Functional	Standard Search Flows	
C115	One Way Flight Search with Valid Inputs	Functional	Standard Search Flows	
C116	Flight Search with Max Passengers	Functional	Standard Search Flows	

Input Validations (4)

Ensures that the system validates mandatory fields, prevents invalid dates, and handles incorrect or missing input gracefully.

ID	Title	Type	Section	Latest & Combined
C117	Search Without Selecting Departure City	Functional	Input Validations	
C118	Search with Return Date Earlier Than Departure Date	Functional	Input Validations	
C119	Search Without Selecting Dates	Functional	Input Validations	
C120	Search With Same Departure and Arrival City	Functional	Input Validations	

Filter and Preference Options (3)

Tests user-defined preferences like airline, service class, number of passengers, and confirms that they affect the search results.

ID	Title	Type	Section	Latest & Combined
C121	Search with Specific Airline Preference	Functional	Filter and Preference Options	
C122	Search with Different Service Class	Functional	Filter and Preference Options	
C123	Search with 2 Passengers and Economy Class	Functional	Filter and Preference Options
